Is your Shed – **SHEDSAFE**? Samford's Allstrong Sheds & Garages are accredited!

Allstrong Sheds & Garages are an authorised distributor for Fair Dinkum Sheds, who is leading the industry to be one of the first businesses that have received The Australian Steel Institute's (ASI) new industry benchmark for steel sheds – **SHEDSAFE**™. When purchasing a steel structure from Allstrong Sheds, you can be certain that its design will meet the standard set by the Building Code of Australia (BCA).

SHEDSAFE™ accreditation, which was officially launched in November 2010, came about after the ASI learned that most sheds that had structural failures during cyclone Larry in 2006, were not built to the standards set by the Building Code of Australia (BCA). Evidence of under-engineered sheds has also been discovered in areas across Australia.

Using a **SHEDSAFE**™ accredited company such as Fair Dinkum Sheds, ensures that all guidelines set by the BCA are adhered to in the design of your shed, barn or garage. **SHEDSAFE**™ accreditation cannot be purchased - it has to be earned and Fair Dinkum Sheds underwent a rigorous independent auditing and certification process by an ASI appointed panel of independent engineers and specialists. "In the past, shopping around for a shed has been a time consuming and confusing process for consumers," says Moss Amor, Allstrong Sheds & Garages. "Luckily the ASI has done the leg work by implementing **SHEDSAFE**™, so consumers no longer need to navigate the complexities of building codes as it has all been researched and tested for them," he says. "We distribute Fair Dinkum Sheds which are **SHEDSAFE**™ accredited so you are assured of a shed or barn design that complies with the standards set by the BCA. If you are dealing with a brand that is not **SHEDSAFE**™ accredited, you should ask them why? We are a reputable local family business that is focused on providing a real shed at a real value price."

Primarily, **SHEDSAFE**™ is about safety for the consumer and it serves to protect the investment in a shed and its contents. Consumers can be confident in the fact that Fair Dinkum Sheds ensure that all standards set by the BCA are incorporated into the design process of each shed and they are able to provide a shed design suitable to specific sites and locations. Unlike some manufacturers that supply the same shed designs in locations all over Australia, they also take into account anticipated usage and environmental factors such as wind load on the structure.

Allstrong Sheds & Garages have a range of residential garages and carports, barns, farm sheds and industrial and commercial buildings. But there is no such thing as a standard Fair Dinkum Shed. All designs can be customised according to the customers' needs using their advanced MultiBuild® software. This allows you to change the design on the spot as well as incorporate options such as sliding or roller doors, personal access doors, garaports, lean-to's, mezzanine floors and more. MultiBuild® software will update your quote and drawings instantly based on **SHEDSAFE**™ engineering principals so you are assured your customisation requirements do not impact the safety of the structure. Whether it's for storage or for a family escape, a functional carport or a farm building, Fair Dinkum Sheds has the range, the quality and competitive pricing to suit everyone's needs.
